Me – I'm a '97 Spanish ELLIS PhD Student focused on my 1st year PhD with a strong interest in Algorithmic Fairness using Causality and Graph theory. **ELLIS** is an AI research network focused on excellence, with **35 units** in 15 countries of Europe (Oxford, Cambridge, EPFL, ETH, Max plank, Alicante...). ELLIS has **199 PhD students** around Europe with an acceptance rate of <5%, and all of them have joint supervision from 2 different countries.

Research Topic – My current thesis addresses the ethical implications of ML decisions, including concepts such as privacy, transparency, accountability, reliability, autonomy, and fairness, which urgently need to be taken into account in critical decision-making scenarios. In this thesis, (1) we study what data might be the cause of unfairness or what data should look like in a “fair” world (2) fairness in graph data to capture complex data relationships and human-generated data, and (3) go beyond observational data and study the long term effects and feedback loops of these proposed algorithms using causality. Specifically, we first study the influence of each data point in a fairness metric for reducing the bias in ML models using *Data Valuation*. Second, we study *Graph Rewiring* methods that ensure fair graph data, and finally, we use *Causality* to improve these methods going beyond observational data for developing fair robust models. In sum, **what data causes unfairness, what data should look in a fair world, and their societal effects.**

EDUCATION

PhD Student / Fairness in ML

Dec 2021 — Present

ELLIS Alicante – Institute of Humanity-centric AI (European Laboratory for Learning and Intelligent Systems)

- Researching on Fairness in ML decision making leveraging graph theory, game theory and causality.
- Supervised by **Dr. Nuria Oliver** (ELLIS) and **Dr. Manuel Gómez Rodríguez** (MPI-SWS, Germany).
- 6-months exchange at **Max Plank Institute for Software Systems (MPI-SWS)**, Germany, Feb-Aug, 2024
- Partially funded by Intel (RESUMAS project), ELIAS European project [101120237-HORIZON-CL4-2022-HUMAN-02], Bank Sabadell and GVA.
- More info: [[European Lab. for Learning and Intelligent Systems - ELLIS](#)] [[Research Topic](#)]

MSc in AI & Data Science

Jan 2020 — Jan 2021

Universitat Oberta de Catalunya

GPA:9.7/10

- Evaluated both Masters and Thesis with Honors
- **Thesis** supervised by **Dr. Baris Kanber** from University College of London: *Deep Convolutional Autoencoder for denoise T1 brain MRI*

BSc in Computer Engineering

Sep 2015 — Jun 2019

University of Burgos

GPA:8.9/10

- Evaluated both Bachelors and Thesis with Honors
- **Extraordinary award**: best student in the promotion.
- **Thesis** carried out in **ADMIRABLE** research lab: *Use of biomarkers extracted from the voice for the detection of Parkinson*
- Press coverage: [1](#), [2](#), [3](#), [4](#), [5](#), [6](#), [7](#), [8](#).

PROFESSIONAL EXPERIENCE

Research Staff

Jan 2020 — Aug 2021

ADMIRABLE and DATAHES research labs

University of Burgos, Spain

- **European project** [2019-1-ES01-KA204-065615] Self-Regulated Learning: SmartArt.
- Behavioural VR data analysis and Platform *UBUMLaas*
- Academic production shown in *Publications* section (Topic: Network Science and Web mining)

AI Consultant

Aug 2019 — Jan 2020

Ernst & Young

Madrid, Spain

- Building ML models for RPA integration: Intelligent Automation

Research intern

Dec 2018 — Jun 2019

ADMIRABLE research lab

University of Burgos, Spain

- Research intern with collaboration scholarship. Research in the project *Use of biomarkers extracted from the voice for the detection of Parkinson* (BSc Thesis).

HONORS & AWARDS

Heidelberg Laureate Forum Young Researcher [\[Link\]](#)

Heidelberg Laureate Forum Foundation, Sep 2023

Selected among 200 young researchers from around the world to participate in the 10th HLFF a highly competitive and prestigious platform, where a few students get the opportunity to interact with Turing Award winners, Abel Prize winners, and Fields Medalists.

Top 10% Reviewer AISTATS 2023 [\[Link\]](#)

International Conference on Artificial Intelligence and Statistics, April 2023

Selected in the top 10% best reviewers in AISTATS 2023 Conference.

Top 10% Reviewer ICML 2022 [\[Link\]](#)

International Conference on Machine Learning, July 2022

Selected in the top 10% best reviewers in ICML 2022 Conference.

FPU PhD Fellowship (Declined) - FPU20/03687

Spanish Government - Ministry of Universities, Sep 2021

Grants for pre-doctoral contracts in Spanish Universities.

Extraordinary Award of Bachelors in Computer Engineering

Council of the University of Burgos, Dec 2019

Top 1 student the Degree in Computer Engineering of the University of Burgos.

Prototype Award [Press coverage: 1, 2, 3]

OTRI (Service for Technology Transfer University of Burgos), Feb 2019

Project awarded: Use of bio-markers extracted from the voice for the detection of Parkinson.

Undergraduated Research Fellowship

University of Burgos, Dec 2018

Assistant research Fellowship in the Civil Engineering department of the University of Burgos, research group ADMIRABLE

Courses with honors

Bachelor's and Master's

8 out of 10 MSc courses evaluated with honours, included Thesis.

10 BSc courses evaluated with honours, included Thesis.

TALKS

[Guest Lecture @ Univeristy of Notre Dame] Polarizaion in Graphs

[ToDo] Indiana , USA, Feb 2024

[Algorithmic Societies ERC @ CCCB] Algorithmic Discrimination

Scientific organization

Tutorial on *Learning on Graphs Conference* “Graph Rewiring: From Theory to Applications in Fairness”

Online, Dec 2022

Organizer and moderator of Qualcomm+ELLIS Reading Group Session about GNN+HCML

Online, Feb 2022

↔ Round table: Pim de Haan, Carlos Castillo, Efstatios Gavves and Manuel Gómez Rodríguez

Volunteer at NeurIPS Workshop "Human-Centered AI"

Virtual, Dec 2021

Open Source software

Open source code from all academic projects, an also both BSc and MSc final projects

Main contributor of *Lightly version 1.1.2* in *Lightly AI PyTorch-based library* for Self-Supervised Learning.

More open source codes in GitHub: applications, experiments and data analysis

SKILLS

Languages and libs

Python, R, Java, Tensorflow, PyTorch, PyGeometric, NetworkX

More interests

Mathematical optimization, Mathematical Modeling, GNN, Reinforcement Learning

Communication

Spanish (native), English (Fluent), German (A1)

Updated Jan 2024
